

INFECTION FIGHTERS!

KILLS VIRUSES!

Recent news headlines are talking about the outbreak of influenza. One cannot be too careful with these conditions and there is a need to use a product that is powerful enough to “kill” the virus. Fuller Brush, a trusted name for over 103 years in the cleaning of hospitals, schools, institutions and homes, has two EPA Registered products that kill a broad spectrum of bacteria and viruses. Both products also aid in the reduction of cross-contamination of these virus infections from one area to another. Even if your family has not been affected directly by these infections, keep them safe with the regular use of these products.

Ideal for use in Homes, Schools, Hospitals and other Institutions!
